ARTHUR ROTKIS

Software Developer | Back-end Specialist

Jardim City, Guarulhos, São Paulo, Brazil | (55) 11 94003-6340
rotkisarthur@gmail.com | LinkedIn | Github

PROFESSIONAL SUMMARY

Software Developer with experience in Back-end development and solid knowledge of algorithms and data structures. Computer Science scholarship student with technical background in Industrial Automation. Proven experience in solving complex problems through participation in programming competitions. Currently developing the Back-end for the Computer Science Student Association (DACC) website using C# and conducting Scientific Research in IoT focusing on integrating legacy machinery with 5G technology. Self-taught professional with strong command of the GNU/Linux ecosystem and advanced skills in multiple programming languages.

PROFESSIONAL EXPERIENCE

FEI University Center - SBC

Programming Competition Monitor

São Paulo, Brazil | 07/2023 – 05/2024

- Contributed to the goal of winning the regional stage of the Programming Competition, enhancing skills in complex problem-solving and advanced algorithms
- Developed technical proficiency in C++ focusing on data structures and graph theory, implementing over 30 different algorithms for problem-solving
- Conducted training sessions for freshmen students, sharing knowledge in competitive programming and problem-solving techniques
- Created and maintained a GitHub repository with more than 50 documented solutions for competition problems, serving as an educational resource for other participants

Marte Updates & Avionics

Electrical Systems Intern

São Paulo, Brazil | 07/2022 – 11/2022

- Acquired specialized knowledge in executive aircraft electrical systems, deepening understanding of electronics applied to aviation

- Performed configuration and testing of 15+ ELT (Emergency Locator Transmitter) units, ensuring compliance with aviation safety standards
- Participated in a team responsible for preventive maintenance of electrical systems, contributing to a 20% reduction in fault diagnosis time
- Documented technical procedures for equipment configuration, improving the team's operational efficiency

EDUCATION

FEI University Center - SBC

Bachelor of Computer Science

São Paulo, Brazil | 2023 – 2027 (Expected)

- Academic merit scholarship recipient
- Active participant in Programming Competitions
- Scientific Research in IoT and 5G technology

Liceu de Artes e Ofícios de São Paulo

Industrial Automation Technician

São Paulo, Brazil | 2020 – 2022

- Final project: Development of an access control system using RFID technology
- Implementation of automated systems focusing on efficiency and security

RELEVANT PROJECTS

- **DACC Website Back-end**: Development of a complete back-end system using C# and ASP.NET Core, implementing authentication, authorization, and database integration
- **IoT Scientific Research**: Applied research for integrating legacy machine tools with 5G technology, developing communication interfaces and data transmission protocols
- **RFID Access Control System**: Implementation of an automated turnstile with RFID authentication, using microcontrollers and embedded software development

TECHNICAL SKILLS

- **Programming Languages**: Java, C/C++, C#, Python, GO, JavaScript
- **Web Development**: HTML, CSS, Express, NodeJS, React.js
- **Databases**: PostgreSQL, MongoDB, Firebase

- **DevOps & Tools**: Git/Github, Docker, GNU/Linux, Vim
- **Methodologies**: Complex problem-solving, Data structures, Algorithms
- **Embedded Systems**: Automation, IoT, RFID, Microcontrollers

LANGUAGES

- Portuguese: Native
- English: Advanced
- Japanese: Basic
